PROFESSIONAL PROFILE

Infrastructure Engineer with 11 years operating mission-critical infrastructure across public-sector, diplomatic, and enterprise environments. Specialized in high availability with a focus on reducing operating costs and hardening security. Currently expanding my skills in automation and modern infrastructures to Cloud Native architectures (Kubernetes, GitOps, IaC). Seeking remote or hybrid roles where infrastructure and operational continuity are the priority.

KEY IMPACT

- **Diplomatic-Scale Email Infrastructure:** Scaled corporate email platform from 150 to 5,000+ active accounts, including 128 foreign diplomatic missions, migrating to Zimbra with high availability and disaster recovery.
- **Threat Reduction:** Deployed IDS/IPS over critical email infrastructure, cutting SPAM incidents from 80% to under 5%.
- **Optimization & Business Continuity:** As IT Manager, optimized corporate telecommunications by 40%, recovered 8+ years of operational data to authenticated NAS systems, and eliminated software licensing costs to \$0 through open-source stack migration.
- **Authentication + High Availability:** Designed and operated LDAP infrastructure for 5,000 users with high-availability replicas, ensuring continuous access to critical institutional communication services.

TECHNICAL COMPETENCIES

- Infrastructure & Production (11+ years): Operating Systems: Linux (RHEL, Ubuntu, Fedora), FreeBSD, Windows Server | Networking & Security: pfSense, Cisco, VPN (IPsec/SSL), IDS/IPS, Firewalling, Hardening | Virtualization: KVM, Proxmox, Hyper-V, Nutanix | Databases: MariaDB, PostgreSQL, LDAP (HA replicas) | Email: Zimbra (administration, migrations, backup/DR) | Monitoring: Zabbix, Prometheus, Grafana | Scripting: Bash, Python
- Cloud Native & Active Adoption (HomeLab + Recent Projects): Containers & Orchestration: Docker, Kubernetes (k3s), Helm | Automation & IaC: Ansible, Terraform (in adoption), GitOps | CI/CD: Git, GitHub/GitLab CI, FluxCD | Cloud: Hybrid infrastructure, cloud migrations (backup/DR)

PROFESSIONAL EXPERIENCE

Infrastructure Consultant & DevOps

datenmaniak — Freelance / Technology Consultancy | Caracas, Venezuela | March 2021 – Present

- Design and operate a production-grade HomeLab (k3s cluster, Proxmox, pfSense, bastion host) as a validation laboratory for Cloud Native practices before enterprise deployment.
- Implementation of GitOps pipelines with FluxCD and Ansible for declarative deployment of infrastructure and containerized applications.
- Infrastructure consultancy for SMBs: virtualization, security hardening, network architecture, and server performance optimization.
- Development of observability stack with Prometheus and Grafana for k3s cluster metrics monitoring, complemented with Zabbix for physical and virtual infrastructure monitoring.

IT Manager

Grupo Jules | Caracas, Venezuela | November 2019 – September 2020 (*fixed-term contract*)

- Led infrastructure modernization achieving 40% optimization in telecommunications and migrating critical systems to cloud providers as contingency backup.
- Deployment of containerized environments (Docker) reducing development team deployment times and facilitating continuous integration.
- Deployment of perimeter security and network services improving corporate communications performance by 50%.
- Data recovery and preservation: recovered 8+ years of operational data and deployed it on NAS systems with authentication, ensuring business continuity.
- Management of secure VPN access for remote corporate operations.

Network & Systems Engineer

Net7PERÚ S.A.C. | Lima, Peru | November 2018 – February 2019 (*Migration project contract*)

- Deployment and **migration of the Zimbra corporate platform** (600+ mailboxes) to Red Hat Enterprise Linux, guaranteeing zero downtime and zero data loss.
- **Migration of traditional virtualization** to hybrid environments on Nutanix, improving infrastructure scalability and redundancy.
- **Automation of operational tasks** on Linux servers via Bash and Python scripts, reducing recurring administration time.
- **Deployment and hardening of RHEL servers** as CentOS replacement in production environment.

Freelance Systems Consultant

N-Vision GmbH, Neuhauf, Onnens Systems | Switzerland / Venezuela | June

2015 – September 2018

- **Infrastructure optimization consulting** for clients in Europe and Latin America, achieving improvements of up to 50% in corporate network performance.
- **Deployed multi-role Linux servers** (DNS, DHCP, Web, Zimbra, Asterisk/VoIP) for environments up to 50 concurrent users.
- **Deployed a pfSense firewall** with perimeter security policies, site-to-site and SSL VPNs, and IDS/IPS system configuration.
- **Vulnerability audits** and system hardening for corporate security standards compliance.
- IP Telephony (VoIP): Asterisk server administration, system upgrade to Red Hat Linux, and IP telephony users management.

Systems Administrator | Zimbra Administrator

Public-Sector Diplomatic Institution | Caracas, Venezuela | August 2003 – January 2015

- **Administration of Zimbra email infrastructure:** 5,000+ active accounts, 128 foreign diplomatic missions, version migrations, backup and disaster recovery.
- **Centralized authentication:** designed and operated LDAP infrastructure for 5,000 users with high-availability replicas.
- **Perimeter security:** deployed IDS/IPS reducing SPAM incidents from 80% to 5% over critical email platform.
- **System administration:** Joint management of 50+ Linux/FreeBSD servers running essential services for institutional communications and operations.
- **International technical delegate** for biometric passport system infrastructure deployment across 6 countries, ensuring security standards compliance and high availability.

- **Automation:** Developed scripting tools (Bash/Perl) for automating tasks on servers, high availability, replication and operational reports.

EDUCATION

Associate Degree (TSU) in Information Technologies

Instituto Universitario de Tecnología “Juan Pablo Pérez Alfonzo”, 1996

Bachelor of Business Administration, with a specialization in Computer Science

Universidad Nacional Experimental “Simón Rodríguez”, 2009

LANGUAGES

- Spanish: Native
- English: B1 (Intermediate)
- French: B1 (Intermediate)

CERTIFICATIONS & TRAINING

- CCNA (Cisco Certified Network Associate)
- Juniper Network Firewall & VPN Implementation

PROFESSIONAL TRAINING

- Certified Kubernetes Administrator (CKA) — In Progress
- AWS Cloud Practitioner — In Progress
- Docker Mastery (Udemy)
- Python Bootcamp from Zero to Hero (Udemy)
- SQL Bootcamp Zero to Hero (Udemy)
